Objective

With around 2.3 years of experience in software engineering, I specialize in Front End Development, creating visually attractive and intuitive interfaces while ensuring seamless cross-browser functionality. I've been an active member of core development teams, ensuring project completion on time and improving user interface activities. Additionally, skilled in using Adobe Experience Manager to construct user-centric web applications. I'm looking for a long-term association with a development-focused company where I may take on additional responsibilities and contribute to impactful projects.

Professional Summary

- Hands-on experience in developing, deploying and maintaining web, mobile and desktop applications.
- Proven expertise in developing, testing and debugging high-performing software solutions with a keen eye for detail.
- Skilled in HTML, CSS, JavaScript, and frameworks such as React & Bootstrap.
- Proficient in project management with effective use of Azure DevOps to streamline workflows and ensure project success.
- Strong problem-solving and communication skills with a passion for learning and implementing new technologies.

Skills

- **Programming Languages** : HTML, CSS, JavaScript, OOP
- **Libraries & Frameworks** : React.js, jQuery, Redux, Bootstrap, Node.js
- **Tools** : Jira, Git, GitHub, Visual Studio Code, Azure DevOps
- **Other Skills** : Adobe Experience Manager (AEM)

Work Experience

1. **Software Engineer**
   LTIMindtree

   01/2022 - 12/2023
   Chennai

   Project Name : *Mondelenz Internatioal Food Service*
   Client : *Kevin Warner*
   Domain : *Customer Success Unit*

   Project Description:

   The project on high-level scope was to revolutionize the website operations of the Mondelēz International by developing a comprehensive digital platform. This platform integrates various aspects of website operations, design and develop a state-of-the-art, user-centric website for Mondelēz International's food service division. The website was aimed at enhancing user experience, streamlining digital interactions, and showcasing the brand's premium products and services. The project has set a new standard for digital engagement within the company, driving significant improvements in user retention and overall customer experience.

   Roles and Responsibilities:

   - Built React-based web application using semantic **HTML5**, **CSS3, JavaScript** and **ReactJS** compiled using **Webpack build** tools and **Unit-tested** end-to-end functionality.
   - Developed high-quality interactive UI elements, scalable, reusable components and Front-end solutions using React.js workflows.
   - Developed code that deals with large data sets by rendering components on UI and optimizing calls to minimize **HTTP requests by 80%** by implementing different optimizing techniques.
   - **Lazy loading** functionality is also implemented to enhance user experience and **performance optimization**.
   - Collaborated with senior UX designers and backend developers to upgrade the website to catch up with changing industry standards.
   - Responsible for integrating the **REST API**s from backend services to ensure smooth data flow and functionality alignment across the platform.
   - Debugged User Interface related issues and conducted thorough testing using **Jest**.
   - Deployed updates and new features using continuous integration/continuous deployment (CI/CD) pipelines.
   - Followed and used the **Agile Methodologies** used in SDLC.
   - Utilized **Jira** for tracking project progress, managing tasks and user stories.
   - Conducted **code reviews** and implemented best practices to maintain high code quality standards across the project.

- I finished the MERN Stack training phase and took an active part in the creation of a basic web application as an Associate Software Trainee.
- Became proficient in web languages like HTML, CSS, and JavaScript during learning stage and also obtained practical experience with relevant libraries.
- Deployed the NodeJS on the server side in order to install the dependencies required for the functionality of web app.

Projects

Personal Portfolio Website - [My Portfolio](#)

- Created a dynamic and responsive personal portfolio website utilizing React.js, JavaScript, HTML5, and CSS3; Designed to showcase my projects, skills, and experience effectively.
- Implemented modern web development principles to ensure compatibility across various devices and browsers

Achievements

- Received Certificate of Appreciation from Project Manager for my phenomenal contribution and support to the successful launch of our project milestone.
- Got 4/5 and 5/5 yearly performance ratings.
- Claimed 1st prize in KHO-KHO at the state level.

Certifications

- Front End Engineer Certificate - *Pro5.ai - 2024*
- Building a Single Page - *Coursera - 2024*
- Responsive Website Basics with HTML, CSS & JavaScript - *Coursera - 2022*

Education

Tirumala Engineering College *06/2017 - 07/2021*

BE/B.Tech in Electronics and Communication Engineering │8.37 CGPA

Chaitanya Junior College *06/2015 - 04/2017*

Intermediate- 95.7%

SSZP High School *2014 - 2015*

SSC- 9.3 CGPA
